

Escalon Digital Solutions

Digital Slit Lamp Imaging

The Escalon Digital Solutions Digital Slit Lamp Imaging System seamlessly captures high-resolution digital images from any photo slit lamp for documentation, presentation, and patient education.

8 Megapixel CCD Sensor

Large CCD sensor provides excellent resolution and dramatic images.

Compatible with Any Photo Slit Lamp

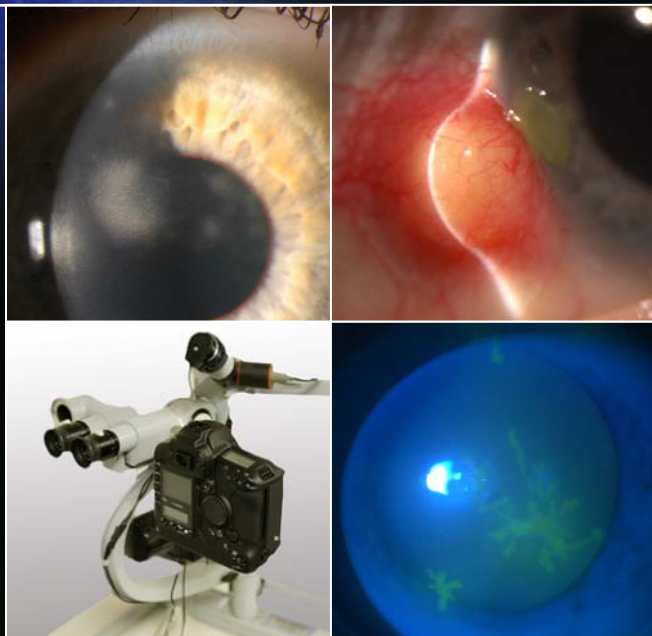

Mounts directly to any photo slit lamp, making it a digital image capture station in just seconds.

Easily Connects to Any Computer

Whether connecting to a network, workstation, or portable laptop computer, the IEEE1394 Firewire interface makes it easy and fast.

OphthaVision™ Software

Efficient and powerful, OphthaVision™ software gives you the power to analyze, archive, and seamlessly integrate all of your slit lamp digital images with your fundus and other diagnostic images.
